MACEDONIA

How Victoria currently looks like

- Smoke from transport, traditional heating;
- Not selective collecting of garbage from citizens;
- High CO₂ emissions;
- No household has photovoltaic or solar panels;

What the municipality does for a green and sustainable life

- Collecting old electronics;
- Selective collecting – in the front of each market in Victoria;
- Cleaning rivers;
- Ecological actions – Earth day, since 2019;

Measures implemented in Iasi

- Information campaigns;
- Planting trees;
- Bike rental service;
- Using renewable energy;
- Thermal rehabilitation of buildings;
- Buying new electrical trams and buses for public transport;

Mayor's covenant

- Signed in 2017, in the context of “Empowering” project;
- Carrying out an inventory on CO₂ emissions;
- Elaborating an Action plan for sustainable energy and climate;
- Reporting once at 2 years;
- Commitment to reduce CO₂ emissions and GHC with 40% until 2030;

Measures to be implemented until 2030

- Implementing an energy management system for buildings;
- Smart counting of electricity consumption;
- Energy audit and energy labeling;
- Thermal isolation of buildings;
- Building a charging station for electric vehicles;

Measures to be implemented until 2030

- Setting up of forest curtains;
- Planting new trees;
- Construction of manure platform;
- Modernizing heating system;
- Energy production, using renewable sources.

Thank you!
